

1 BILL NO. S-82-06- 06

2 SPECIAL ORDINANCE NO. S- 114-82

3 AN ORDINANCE approving City Utilities
4 Purchase Order No. A-011632 with
5 ITT Courier Terminal Systems, Inc.
6 for the lease of fifteen (15) terminals.

7 BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF
8 FORT WAYNE, INDIANA:

9 SECTION 1. That City Utilities Purchase Order No.
10 A-011632, between the City of Fort Wayne, by and through the
11 City Utilities Purchasing Agent and the Board of Public Works and
12 ITT Courier Terminal Systems, Inc., for:

13 the lease of fifteen (15) terminals on a
14 twenty-four (24) month plan with an
15 option to purchase at the end of the lease
16 for the Data Processing Department,
17 at a cost of Sixty-one and No/100 (\$61.00) Dollars per month
18 per unit, all as more particularly set forth in said Purchase
19 Order, which is on file in the Office of the Department of
20 Purchasing and is by reference incorporated herein, made a part
21 hereof, and the same is in all things ratified, confirmed and
22 approved.

23 SECTION 2. That this Ordinance shall be in full force
24 and effect from and after its passage and approval by the Mayor.

25

PAGE # 7

ITT COURIER RESPONSE

CITY OF FT. WAYNE INVITATION TO BID # 640

DELIVERY

ITT Courier will ship within 90 days of receipt of correctly executed lease or purchase documents and will exert best efforts to improve upon that lead time if quicker shipment is required.

The City selects the mode of transportation (Common Carrier surface VS Air Freight) and therefore controls the amount of time the equipment can be expected to be in-transit.

The proposed units need not all be shipped at once, however freight costs are higher when multiple shipments are stipulated.

FREIGHT CHARGES

Current common carrier surface freight charges, including inside delivery for these units are:

15 Units shipped at once	- \$267.37 Total
5 Units per shipment	- 115.69 Per Shipment
1 Unit per shipment	- 45.98 Per Shipment

ITT Courier prepays freight and invoices the customer.

The city would be responsible for the freight charges to return the units to ITT Courier at the end of the initial lease or any extended lease term.

TERMINAL SPECIFICATIONS OF THE CITY

- * Must be "plug compatible" with and IBM 3278 terminal through an IBM 3274 controller.

ITT COURIER EXCEEDS SPECIFICATIONS ! The ITT Courier 2780-13 display terminal not only is compatible with the IBM 3278, it has added value features not found in that product. ie: low profile design, light weight construction, adjustable keyboards, non-smudge screen, Hooded screen to reduce glare, etched glass non-glare screen, variable field underline, and attribute character reveal features.

Compatibility with the City's 3274 channel controller was demonstrated live to the Data Processing department earlier this year.

The ITT Courier 2780-13 is also plug compatible with IBM 3274 remote terminal controllers, IBM 3276 remote terminal controllers, and the integrated device adapter of the 4344 system.

- * Screen size should be 8" x11" or 80 characters x 24 lines.

ITT COURIER EXCEEDS SPECIFICATIONS ! Compatible with IBM 3278 specifications, ITT Courier adds a 25th line of constantly updated status information.

- * Needs to have a selection of keyboards.

ITT Courier meets the specification of having a variety of keyboards. We do not offer all of those styles specified here on this particular model. Specifically:

A- Standard Typewriter Keyboard	-YES - Feature 1031
B- Standard Data Entry Keyboard	-YES - Feature 1032
C- Typewriter with 12/PF	-YES - Feature 1031
D- Typewriter with 24/PF	-YES - Feature 1034
E- Typewriter with 12/PF + 10 Key Pad	-YES - Feature 1033
F- Typewriter with 24/PF + 10 Key Pad	Other models only
G- Data Entry with 10 Key Pad	Other models only

- * Should have Variable Field Underlining feature.

ITT COURIER EXCEEDS SPECIFICATIONS ! ITT Courier not only offers the feature as standard, the operator can select it with a single key depression.

Each Courier terminal highlights variable fields on the screen by generating an underline character for each position of the screen.

- Operators know field sizes and when to abbreviate
- New operators are trained more easily
- No programming is required
- Fewer errors from over-running data fields
- Screens are easier to read - they look like a form
- The system need not transmit the underscores to the screen nor strip them out of received data prior to processing

- * Must be compact and easily transportable

ITT Courier meets specifications. Weighing only 55 lbs, the ITT Courier 2780-13 display terminal weighs far less than competitive models.

Once moved, the coax is more simple to connect. There is no need to remove a cover from the display.

It's low profile design makes it easier to carry and allows it to fit into many locations where taller terminals could not fit.

- * Should have a Key-Lock and Audible alarm for security purposes.

ITT Courier meets specifications. Security keylocks and audible alarms are available as extra cost options on those displays where those features are needed.

- * Green on green screen color

ITT Courier meets Specifications. Eye-ease green phosphors are used to prevent eye fatigue which leads to errors. Operator adjustable dual intensity is standard for highlighting. And, overall screen brightness is separately adjustable by the operator.

PAGE # 10

ITT COURIER RESPONSE

CITY OF FT. WAYNE INVITATION TO BID # 640

- * Service and maintenance must be readily available on site. (within 50 miles or 4 hours during normal business hours)

ITT COURIER EXCEEDS SPECIFICATIONS ! ITT Courier provides local field engineering maintenance support in Ft. Wayne.

ITT Courier field engineers are terminal system specialists who have each been school trained on telecommunications in general and the 2780-13 in particular.

Because they are specialists in terminals, they carry complete spares in their cars. Seldom would there be a need to wait for parts or for him to return to his office for parts.

This means that the City of Ft. Wayne can expect quick response by well trained terminal specialists who have the parts with them to repair your ITT Courier Terminals.

What this really means is that your ITT Courier Terminals and Terminal Systems will help your people get more work done each day.

PAGE # 11
ITT COURIER RESPONSE
CITY OF FT. WAYNE INVITATION TO BID # 640

CUSTOMER SET-UP TERMINAL

The ITT Courier 2780-13 Display Terminal is so simple to set-up that you need not even wait for a service man to come to install it.

Attached is a site planning guide to help you prepare for delivery and installation of the 2780-13.

Please note the Customer Set-up riders attached to the Equipment Lease Agreement and to the Purchase Agreement forms found in the folder attached to this response.

More detailed unpacking and testing information is sent with each shipment. Should you require advanced copies of these documents, please call your sales representative.

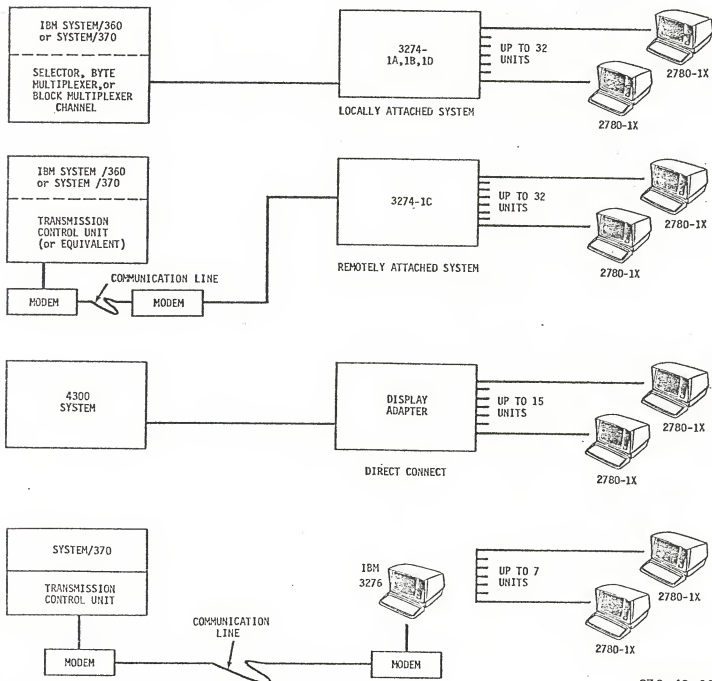

2780 SITE PLANNING GUIDE

INTRODUCTION

This site planning guide provides you with the information necessary to prepare your site for the setup of an ITT Courier 2780 DISPLAY TERMINAL. The diagram below shows you the possible configurations where the 2780 may be used.

By using these guidelines and planning ahead, you can insure your location will be ready for the terminal when it arrives. Detailed unpacking and setup instructions shipped with each terminal will enable you to unpack, position, setup and check out the 2780 without the help of an ITT Courier service representative.

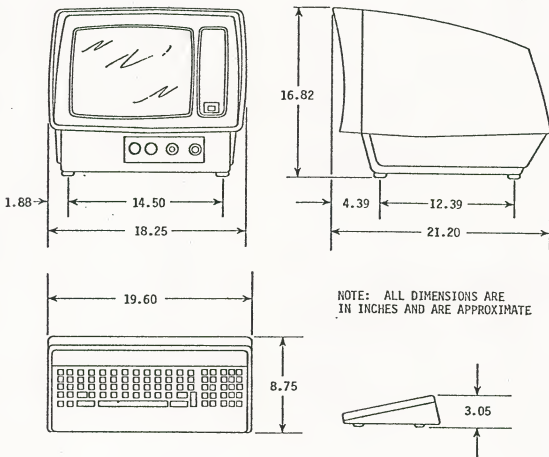

PLANNING THE LOCATION OF THE TERMINAL

Plan to place the terminal on a desk or table in a location suitable for your application and workload. Make sure the desk or table is of a comfortable height for operator use.

The diagram below shows the dimensions of the 2780 DISPLAY TERMINAL. Use this information when determining the size of the desk or table.

Clearance on all sides and above the unit must be available during maintenance and servicing. A minimum of 3 inches (7.62 cm) clearance on all sides and 6 inches (15.24 cm) clearance on the top is required for proper air circulation.

It is recommended that a telephone be located near the terminal so the terminal user can talk with the control unit operator as needed.

Power Cord: In planning the placement of the 2780 terminal the length of the power cord must be considered. An 8 foot cord (2.3 meters) which is attached at the left rear of the terminal is standard and supplied by ITT Courier.

Environment: The 2780 is designed to operate satisfactorily in conditions typical of most commercial business offices. The table on the following page lists the operating environment requirements and ranges of the unit.

CONDITION	OPERATING	NON-OPERATING (STORAGE)
Temperature	4 ⁰ to 38 ⁰ C (40 ⁰ to 100 ⁰ F)	-29 ⁰ to 71 ⁰ C (-20 ⁰ to 160 ⁰ F)
Relative Humidity	10% to 80% (Non-cond.)	10% to 80% (Non-cond.)
Temperature Change	11 ⁰ C (20 ⁰ F) per hour	33 ⁰ C (60 ⁰ f) per hour
Altitude	4,000 m (13,125 ft)	12,000 m (40,000 ft.)

WARNING

This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. As temporarily permitted by regulation, it has not been tested for compliance with the limits for Class A computing devices pursuant to Subpart J of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

Weight: The 2780 and attached keyboard weigh approximately 55 pounds (23 kg) unpacked. The shape and weight require at least two people to lift or carry the unit. Plan to have at least two people available to unpack the unit and set it in place when it arrives.

POWER RECEPTACLE REQUIREMENTS

A 120-volt, 15 ampere, single phase, 60-Hertz grounded AC power outlet is required for the 2780. This type of receptacle is commonly supplied for office equipment. The maximum continuous load for the unit is 1.5A.

For safety and proper machine operation, each receptacle must be grounded. A separate insulated grounding conductor is recommended. If you have any questions concerning the grounding of your receptacle, contact your electrician.

DEVICE CABLE

The device cable, (signal cable), between the 2780 and the control unit is commercially available US designated RG 62 A/U coaxial cable. The maximum cable length between the 2780 and its control unit is 5000 feet.

This cable is not shipped with the 2780 DISPLAY TERMINAL. It is your responsibility to obtain and install the cable. You should plan to have the cable installed and ready for connection to the 2780 when it arrives.

SETUP REQUIREMENTS

If the 2780 is to be added to an existing system schedule the installation for a time when the control unit can be taken off-line. Approximately one-half hour should be scheduled to resolve any problems which may occur on the new terminal.

This terminal has no address strapping. The control unit must be configured to accept the 2780 prior to connecting the new terminal to the unit.

Those people who will be performing the installation should become familiar with the 2780 Display Terminal prior to actually installing the unit. The 2780 Operators Instruction Manual is available from your ITT Courier Sales Representative.

AGREEMENT FORM EXPLANATION - CONTENTS OF ATTACHED FOLDER

Attached is a white folder containing ITT Courier Agreement forms which have been partially completed for your information and ease of ordering.

This entire bid response is based upon the terms and conditions contained in these agreements and riders.

Some quantities of some features have been left blank because it is not known exactly what mix of features is required on what terminals. Merely type in the quantities required before approving the documents by signature or initial as appropriate. Where a quantity should be "none", type "none."

PURCHASE FORMS -- LEFT POCKET

Purchase Agreement - defines the basic buyer-seller relationship for the purchase of the equipment and features listed. Approved by Signature.

Customer Set-Up Rider to Purchase Agreement -- defines the responsibilities of buyer and seller for installation of the models of equipment listed on the rider. Approved by Initials. Required for models bid here.

Equipment Maintenance Agreement (Purchase) -- defines the ground-rules applicable to contracted maintenance service from ITT Courier and establishes pricing for the equipment ordered on the purchase agreement. Maintenance charges begin 30 days after installation as defined in the purchase agreement and modified by the Customer Set-Up rider. Approved by Signature. Is not required. Buyer may choose to maintain his own equipment, however less than 1% of Indiana customers do their own maintenance.

LEASE FORMS -- RIGHT POCKET

Schedule of Terms for Equipment Lease Agreement -- Establishes the basic Lessee-lessor relationship between the parties and forms the basis of the first and subsequent lease agreements. Approved by Signature.

Equipment Maintenance Agreement (Lease) -- defines the terms and conditions under which ITT Courier supplies maintenance services for leased equipment. Approved by Signature.

LEASE FORMS - CONTINUED

Equipment Lease Agreement -- Refers to the basic terms and conditions of the Schedule of terms and Maintenance Agreements while specifically defining models and features of equipment, prices, lease term and locations for this individual order of equipment. May be accompanied by one or more riders. Approved by Signature.

Early Termination Due to Lack of Fiscal Funding Rider -- provides the means by which governmental bodies who are prohibited from committing funds beyond the end of their fiscal year can enter into lease agreements extending over one or more fiscal boundaries and thereby benefit from lower lease rates. Usually required by law for governmental units. Not required by ITT Courier. Approved by Signature.

Purchase Option Rider -- Preserves the Lessee's right to purchase the leased units at some future date by executing a separate purchase conversion agreement. Establishes initial purchase prices and the method of accruing credits toward future purchase by virtue of the units having been leased. Preserving these options does not increase the lease price. Not required by ITT Courier. Approved by Signature.

Customer Set-Up Rider (Lease) -- defines the responsibilities of the Lessor and Lessee for installation of the models of equipment listed on the rider. Required for models bid here. Approved by initials.

This has been a brief overview of the use of the lease and purchase forms attached in the folder. The actual wording of the documents, if in conflict with these explanations, prevails.

Re: Bid Reference 640

Gentlemen:

Thank you very much for considering National Advanced Systems Corporation as a potential vendor of equipment requested in Bid No.640. As a vendor of medium and large central processing units, add-on memory, and direct access storage devices, we are unfortunately unable to respond to your request for CRT terminals. Please refer to the enclosed brochures for descriptions of the products that we currently market.

Inasmuch as we must "No Bid" this current request, we have not completed the Non-Collusion Affidavit and the Proposal and Bid Surety Form. We would very much appreciate your maintaining us on your list of potential vendors of EDP equipment, however. We look forward to responding to future bids for requirements that fall in our market area.

Very truly yours,

Atam P. Lalchandani
Treasurer
